GEC JOURNAL OF SCIENCE & TECHNOLOGY

INDEX TO VOLUME 39, 1972

THE GENERAL ELECTRIC COMPANY LIMITED

INDEX

volume 39, 1972

Inclusive page numbers for the year's issues are:

No. 1..... 1 to 44
No. 2..... 45 to 96
No. 3..... 97 to 144
No. 4..... 145 to 188

PAGE

A

Acoustic delay lines—Improved microwave, using magnesium aluminate spinel.....91
Acoustic-wave devices—Surface.....156
Alphanumeric displays—Solid-state programmable.....29
Analytical instrument—Electron microscope and microprobe analyser: a new.....146
Angel clutter in radar systems—Ground and: the two-beam solution.....173
Application of the computer to aerial design and development.....52

B

Broadcasting—Fifty years of British.....28

C

Chemistry of tungsten-halogen incandescent filament lamps.....125
Clutter in radar systems—Ground and angel: the two-beam solution.....173
Coaxial cable link—Design of a digital.....15
Colour-television camera—Design of a modern automatic: the Marconi Mark VIII.....98
Communications satellite—Design of the Skynet II.....2
Computer—Application of the, to aerial design and development.....52
Control and signalling methods for safe high-speed running—Train.....70
Control devices for gas-cooled nuclear reactors.....115
Control from the mine shaft—Mine-winder.....137
Control of telephone exchanges by s.p.c.—Total.....181
Control of thermal processes in iron and steel production.....107
Control techniques for large gas turbines—Developments in.....34

PAGE

D

Delay lines—Improved microwave acoustic, using magnesium aluminate spinel.....91
Design and development—Application of the computer to aerial.....52
Design of a digital coaxial cable link.....15
Design of a modern automatic colour-television camera: the Marconi Mark VIII.....98
Design of the Skynet II communications satellite.....2
Developments in control techniques for large gas turbines.....34
Development of fuelling grabheads and their instrumentation for gas-cooled nuclear reactors.....46
Development of high-voltage insulation systems for rotating machines.....21
Drives for d.c. hoists—Thyristor-convertor.....163

E

Electron microscope and microprobe analyser: a new analytical instrument.....146
Equipment for Wylfa nuclear power station.....51

F

Fifty years of British broadcasting.....28
Frequency-selective networks suitable for microelectronic realization—2.....61
Fuelling grabheads and their instrumentation for gas-cooled nuclear reactors—Development of.....46

G

Gas-cooled nuclear reactors—Control devices for.....115
Gas-cooled nuclear reactors—Development of fuelling grabheads and their instrumentation for.....46

PAGE

G *continued*

Gas turbines—Developments in control techniques for large....34
Ground and angel clutter in radar systems: the two-beam solution....173

H

High-voltage insulation systems for rotating machines—Development of....21
Hoists—Thyristor-convertor drives for d.c....163

I

Improved microwave acoustic delay lines using magnesium aluminate spinel....91
Instrumentation techniques—Transonic flow in steam turbines: experimental testing and....8
Insulation systems for rotating machines —Development of high-voltage....21

L

Lamp phosphors—Particle-size distribution of: comparison of measurement techniques....76
Lamps—Chemistry of tungsten-halogen incandescent filament....125

M

Machinery for new container ship—88 000 shp....185
Marconi Mark VIII—Design of a modern automatic colour-television camera: the....98
Measurement techniques—Particle-size distribution of lamp phosphors: comparison of....76
Medical telemetry by radio....85
Microelectronic realization—Frequency-selective networks suitable for—2....61
Microscope and microprobe analyser—Electron: a new analytical instrument....146
Mine-winder control from the mineshaft....137

N

Networks—Frequency-selective, suitable for microelectronic realization—2....61
Nuclear power station—Equipment for Wylfa....51
Nuclear reactors—Control devices for gas-cooled....115
Nuclear reactors—Development of fuelling grab-heads and their instrumentation for gas-cooled....46

P

Particle-size distribution of lamp phorphors: comparison of measurement techniques....76
President of I.E.E. 1972-3....180

PAGE

R

Radar systems—Ground and angel clutter in: the two-beam solution....173
Radio—Medical telemetry by....85
Reactors—Control devices for gas-cooled nuclear....115
Reactors—Development of fuelling grab-heads and their instrumentation for gas cooled nuclear....46
Rotating machines—Development of high-voltage insulating systems for....21

S

Satellite—Design of the Skynet II communications....2
Ship—88 000 shp machinery for new container....185
Signalling methods for safe high-speed running—Train control and....70
Solid-state programmable alphanumeric displays....29
S.P.C.—Total control of telephone exchanges by....181
Steam turbines—Transonic flow in: experimental testing and instrumentation techniques....8
Steel production—Control of thermal processes in iron and....107
Stored-program control in telephone switching systems....131
Surface-acoustic-wave devices....156
Synopses....44, 96, 144, 188

T

Technical literature....43, 95, 143
Telemetry by radio—Medical....85
Telephone switching systems—Stored-program control in....131
Television camera—Design of a modern automatic colour-: the Marconi Mark VIII....98
Thermal processes in iron and steel production—Control of....107
Thyristor-convertor drives for d.c. hoists....163
Total control of telephone exchanges by s.p.c....181
Train control and signalling methods for safe high-speed running....70
Transonic flow in steam turbines: experimental testing and instrumentation techniques....8
Tungsten-halogen incandescent filament lamps—Chemistry of....125

W

Wylfa nuclear power station—Equipment for....51
